FROM: Pat Haas, Real Property Lister

As a matter of general policy, the *Parcel Identification Numbers (PIN's)*, also referred to as *Computer Numbers*, on split parcels (those that have been divided during the year) are assigned after January 1 of the following year.

When entering PIN's on documents, where it is known that the parcel in question is less than as described on the current roll, one should use the "parent" number with a "p" placed after it (the p being an abbreviation for pending).

Should there be any questions about this procedure, please call us at the number above.
